Guided Retail Store Tours
Separate registration and additional fee required.

Guided Retail Store Tours can be purchased when you register for NRF 2020 or through the dashboard after registration has been completed.

Retail Store Tours provide curated, two-hour guided walking tours of cutting-edge spaces by global retail leaders. See firsthand how these retailers are using their understanding of our changing behaviors and technology to enhance the customer experience.

Each guided tour visits five carefully selected stores at a premier shopping destination. Tour guides will lead groups to the selected stores where a store administrator will speak about the features, innovations, store design experience, customer service enhancements and brand stories. Each store visit will last 15 minutes, and each tour lasts two hours.

Hudson Yards: The State of Excellence Today
Hudson Yards represents the best of what retail has to offer! This new addition to New York City retail is the largest private real estate development in the U.S. Join this tour to see the five trends driving successful retail today: Elegant Innovation, Discovering Innovative Retail Models, Retail as an Experience Destination, Experiences that Inspire Shopping, and Out-of-the-Box Retail.

Oculus: A Tour for the Senses
See how the largest shopping malls in Manhattan -- Westfield World Trade Center and Brookfield Place -- are transforming downtown shopping and using cutting-edge design, sales associate training and innovative experiences. The Oculus has
the most diverse array of retail innovation in New York City, featuring pop-ups to flagship stores, along with iconic retailers and online brands that have transitioned from online to brick and mortar.

**SoHo: Innovation & Reinvention**

SoHo is one of New York City’s prime shopping destinations and the preferred location for launching a new business concept or reinventing an old one. Throw a stone down any street in the area and you’ll hit a number of exquisite retail destinations. Cobblestoned streets and loft-like spaces make the neighborhood a pleasant spot for shopping and inspiration. This tour will highlight visionary business innovators and savvy re-inventors.

**Iconic Retailers**

This tour of New York’s iconic retailers offers insight into the latest innovations in store design with the ideas, influencers and thought process behind their conception. The tour will visit iconic stores in the heart of the Midtown shopping district. Experience store innovation, tech, store concepts, merchandising, and how brands are seeing sustainability.

The state of the food industry
Technology trends come and go, but also create efficiencies and enhancements to the food and beverage, hospitality, and retail industries. New and emerging technologies shape the way businesses are run and customers are engaged. With all the noise of new and fancy technologies, how do you know what’s right for you? In this session, learn about technologies you might want to invest in over the next 12 months.

Why integrated ordering helps you and your customers
Today, the ways in which you can order a product are seemingly endless – in-store, online, at a drive-thru, or through a smart home assistant. Google, Amazon, and countless brick-and-mortar stores are utilizing any and all methods to reach current and prospective customers. In this session, learn options for online ordering and how to determine which platform is right for your business and its customers.

SPEAKERS:
Christopher Thomas-Moore,
VP, Digital Marketing and Global eCommerce, Domino’s Pizza

Deep Dive: Technology trends and ordering

PROGRAM TYPE: EXHIBITOR BIG IDEAS

How data and analytics are reshaping retail

With tight margins, volatile markets, and changing customer demands, retailers cannot rely on intuition alone to drive growth. You need data-informed insights.

See why retailers are turning to visual analytics and Tableau to help them meet the demands of a rapidly changing industry. But don’t just take our word for it, attend and hear from one of our retail customers about how they are doing just that. Learn how creating a data culture helped to digitally transform their business and solidify analytics as their competitive edge.
**Make your data work for you!**

From the early days of computers to the breakthrough of the internet, companies have understood inherently that there is worth to information. We live in a culture driven by data. A truly digital world where information is available at our every fingertip. With a skill gap and a mess of a data system, the hurdles can seem insurmountable. Automated intelligences and machine learning are closing that gap by helping a variety of companies’ make data guided decisions and reap the benefits of their data.

**Immersive... Reimagined...Revolutionary: The future of shopping beckons**

It’s time to throw out the old playbooks and write new ones. Executives from SHOWFIELDS and AREA15 are doing just that. Experimenting with models that blend physical and digital retail in an effort to revitalize bricks-and-mortar retail, these two models drive home the theory that traditional retail is not dead; it’s evolving – and they’re doing it in very different ways.

**SPEAKERS:**

Tal Zvi Nathanel, CEO and Co-Founder, SHOWFIELDS
Winston Fisher, CEO, AREA15
Pocket brands: Why Facebook and Instagram think social is the fastest growing sales channel

Shopping capabilities on social media platforms are evolving with lightning speed. Already a vital part of many consumers' discovery and purchase journey, capabilities such as the arrival of Instagram's seamless in-app checkouts - adopted by the likes of Nike and MAC Cosmetics - confirms how content and commerce are merging. It's clear that social is fast becoming a vehicle for driving more sales, more efficiently, and for connecting with customers more directly.

This discussion will focus on the brands and retailers using social media in innovative ways to both sell products and communicate with customers well beyond the transaction. With the latest buy buttons, apps and e-commerce plugins, social media channels are helping retailers take the friction out of the buying process. We will discuss the best ways to engage with Gen Z for social selling, and how retailers might even drive traffic to physical stores or harness customer feedback to inform future (product) decisions with the right kinds of social interactions. The panel will share examples of engagement and loyalty-building via social media that is delivering sales growth, promoting the brand mission and reaching new customers in interesting ways. This session will also ask what's next, how will social commerce look in 5 or 10-years' time, and why it's so important for brands to jump in.

SPEAKERS:
Asher Rapkin,
Head of Messenger & Emerging Platforms, Global Business Marketing, Facebook
Alexis DeSalva Kahler, Senior Analyst, Retail and eCommerce, Mintel
Layla Amjadi, Product Lead, Instagram Shopping
Amy Eschliman, Senior Vice President, Sephora ECommerce, Sephora
Retailer Table Talks

*Open to Retailers only.*

Join these small group, retailer only discussions focusing on specific topics and challenges retailers are facing today. The intimate environment will enable you to share and hear solutions, unique perspectives and valuable takeaways to implement immediately. Discussions are chosen by and led by retailers. Space is limited and will be first-come, first-served.

**Reshaping the retail store experience at Dunn-Edwards**

Retailers must re-imagine stores in the digital age. Stores continue to evolve from individual points of commerce to hubs of fulfillment, service and experience. Retailers are using stores to inspire shoppers with more interactive brand engagement while improving the profitability across their operations. In the midst of this change, the traditional point-of-sale is evolving to provide multi-dimensional capabilities that accelerate store performance. Join Toshiba and Dunn-Edwards, the leading paint manufacturer in the Southwestern USA, to explore the future of point-of-sale amid emerging new retail store experiences.

**SPEAKERS:**

*Rich Stefani,*
CIO, Group Vice President of Technology, Nippon Paint (USA), Inc.

*Fredrik Carlegren,*
Executive Director, Global Marketing, Toshiba Global Commerce Solutions

**Retail in the cloud: How new models are bringing stability to retail**

Retailers today are struggling to adopt new capabilities due to challenges with integrating new applications into complex legacy environments. This is hindering many retailers’ ability to quickly alter their operating model, to improve customer experience, increase revenue and lower operating costs. Learn how cloud is changing the game! From application modernization, multi-cloud management and new models, stores can realize faster, lower cost deployment of new capabilities infused with AI, IOT and Intelligent Automation; all benefiting your customers and employees.

**Session produced by Episerver**
**Turn customers into lifelong fans: Experience-driven commerce in action**

Offering the best products or prices is no longer enough to succeed in today’s retail environment. Customers want a personalized experience, before, during and after their purchase. And they want that experience to be seamless across channels and devices. The smartest (and most successful) companies are using this new market reality as an opportunity, turning customers into lifelong fans. Join us to hear how SIGNA Sports United, one of the largest sports online platforms in the world, is delivering inspiring, experience-driven commerce to their customers.

**SPEAKERS:**
- Michael Gerard, CMO, e-Spirit Inc.
- Thomas Neumann, Group CTO, SIGNA Sports United

Transforming the in-store experience: How Albertsons, Pinterest, and Vestcom inspire at shelf-edge

Shoppers are seeking inspiration and more meaningful interactions with brands. While brand messaging is still fragmented across channels, the physical shelf-edge is pivotal to both Retailers and Brands as the key engagement point to drive purchase. Learn how Pinterest, Albertsons, and Vestcom have partnered to bring digital inspiration to the shelf-edge, enhancing the shopping experience, and ultimately driving sales.

12:00 - 12:30pm | MEDALLIA STAGE, HALL E, LEVEL 1
PROGRAM TYPE: FEATURED SESSION

Bringing bricks to life: LEGO knows the child in all of us

Retail's digital transformation is wondrous in many respects, but on the downside a thirst for convenience can reduce the shopper experience down to uninspiring levels of functionality.

There is a risk that by not finding the balance shoppers will lose any connection to the brand, particularly when visiting a physical store to find there are no 'memorable moments.'

At the LEGO® Stores we leverage new digital technologies as a layer that will enhance the brick and mortar store visit with stronger fun and creative experiences. We create memorable moments that bring our brand and products to life, including personalization as a unique experience for our brand fans. For instance, within minutes shoppers can create their own LEGO Mini figures or even their own personalized portrait built with 2,304 LEGO bricks.

This session celebrates what becomes possible when a powerful global brand, the latest digital tools and the human imagination combine to create something very special in store.

SPEAKERS:
Martin Urrutia Islas, Head Global Retail Innovation, The Lego Group
Lauren Thomas, Retail Reporter, CNBC

PROGRAM TYPE: FEATURED SESSION
From points to passports: Reimagining the loyalty program

As companies look for compelling ways to get customers in the front door, retain their business and convert them into advocates, we're witnessing a new way of thinking about loyalty that shifts the conversation away from points acquisition into access to a broader ecosystem. This approach not only enables members to earn rewards but also invites them into the larger world of the brand, empowering them with key tools across their journey and adding value through exclusive experiences and services.

Join Rick Gomez, Executive Vice President, Chief Marketing and Digital Officer of Target, and Matthew Blonder, Vice President, Marketing and Digital Brand Commerce at Reebok, as they discuss their best-in-class loyalty programs.

Rick Gomez will explain why Target consolidated its suite of mobile apps into a unified tool that functions as a gateway through which shoppers can access a range of key functions at every stage of their journey, from mobile shopping to loyalty to payments, and how this allows Target to offer a more responsive and convenient shopping experience.

Matthew Blonder will discuss the strategy behind the Reebok Unlocked loyalty program, which lets members earn points for interacting with the brand beyond making purchases and offers experiential rewards, creating an ongoing connection between the brand and its most loyal customers, as well as the community at large.

Matthew Blonder,  VP, Marketing and Digital Brand Commerce, Reebok
Grassroots mission: The journey to sustainability
Where did it come from? More consumers are asking that question; it’s up to retail brands to respond with authentic, transparent answers about sustainable business practices they’ve adopted and the ethical sourcing processes in play. Two retail leaders will share their commitment to sustainable sourcing objectives, the value of certifications, partnerships and relationships with farmers and artisans, and the goals they’ve set for shifting the product offerings toward more organic, fair trade certified.

SPEAKERS:
Heather Deeth, Manager, Ethical Buying, Lush Cosmetics North America
Jennifer Walsh, Founder, Walk with Walsh Media
Jennifer Gootman, VP, Social Innovation, West Elm; VP, Corporate Social Responsibility, Williams-Sonoma Inc.

Building a Successful Brand: A fireside chat with Lisa Price
Lisa Price, Founder, Carol's Daughter discusses how she went from making hair and body products in her kitchen to having a successful company with products that are sold in retailers nationwide.

Hear how she succeeded while navigating the changing landscape of the natural haircare industry in the age of social media.

Expo Tours
Open to Retailers only. Separate registration required.
EXPO Tours can be purchased when you register for NRF 2020 or through the dashboard after registration has been completed.

NRF, in partnership with CIM Tours, is providing four unique Expo Tour experiences. Each curated, two-hour tour will visit exhibitors recognized for delivering the latest in retail technology across multiple business disciplines.

Artificial Intelligence | Artificial Intelligence is taking retail to a new level and changing the way we shop. Learn how retailers are using advanced AI with first-party data, real-time AI-based recommendations, AI-enabled decision platforms, customer driven AI insights and much more!

Customer Experience | Customer experience today is driving the success of brick & mortar. Retailers are using smart sales associate tools to enhance the shopping experience, reduce check-out friction, streamline internal communications, and collect real-time customer feedback. Cutting-edge smart signage, RFID and 5G are making the retail environment more responsive and interactive. Meet the companies enhancing the customer journey and winning in retail today.

Digital Experience & Ecommerce | Creating digital experiences that matter to consumers drives results. As digital continues to permeate the retail landscape, today’s shoppers are demanding less payment friction and a quicker shopping experience. Learn how retail leaders are using digital in every aspect of the customer journey to drive results.

Future & In-store Tech | See the newest technology trends and breakthrough products in retail today. Learn how AR/VR can engage shoppers, how technology is enhancing the shopping experience, and how click and collect reduces friction and satisfies customers. Attendees will visit companies focused on innovation and get a sneak peek at technology powering the future of retail.

What’s next in retail: Meeting consumer expectations via connected commerce experiences
In an increasingly connected world, retailers must create experiences that are not only engaging, but span digital channels, devices, and emerging technology.

In this session Nandan Sheth, Head of Global Digital Commerce at Fiserv, will discuss the expanded possibilities connected experiences are bringing to retail. Presenting in partnership with Fanatics, Sheth will walk through connected experiences that Fanatics is winning with today, and explore how technologies like Artificial Intelligence and Augmented Reality may redefine consumer interactions in the future.

SPEAKERS:
Nandan Sheth, SVP, Head of Global Digital Commerce, Fiserv
Podcast: The Retail Exchange

The Retail Exchange is a dedicated retail podcast series that throws the spotlight on key issues affecting the industry. Our podcasts feature insight and opinion from senior industry professionals and thought leaders.

Produced by:

The Age of AI: Women Shaping the Future of Retail

Today, women are vastly underrepresented in the tech industry. If the AI is the future and the future is feminine, then we need more women calling the shots. After all, there's still no algorithm that substitutes for human connection. In this discussion, learn how female thought leaders are harnessing the power of AI and other digital tools to get closer to the consumer.

SPEAKERS:

Christiane Pendarvis,
Senior Vice President, E-Commerce, FULLBEAUTY Brands

Alysa Taylor,
Corporate Vice President, Microsoft Business Applications and Global Industry, Microsoft

Seemantini Godbole, Chief Information Officer, Lowe's
Disruption: Rapid growth of CBD products impacting big box, digital, specialty and department stores

With many new CBD products hitting the marketplace, stores are figuring out how to integrate this relatively new product category. Beauty departments were natural early adopters but now with mattress, shoe and apparel retailers to yoga studios finding their niche, CBD infused merchandise is clearly on the rise. This new frontier is prompting retailers to ferret out world class products, find trustworthy suppliers, train staff and establish merchandise strategies to gain ground quickly. Our expert panel will break it down, including--are CBD products right for your store, how to get started and what's trending...don't miss this opportunity to understand this disruptive new product category.

SPEAKERS:
Peter Horvath, CEO, Green Growth Brands
Stephanie Wissink, Managing Director, Consumer Research, Jefferies
Eventizing shopping: Creating compelling experiences online and in-store

Consumers increasingly value experiences over things and spend their money accordingly. In the same way, the enjoyment of shopping is as much about the excitement of discovering, learning and talking about a product as it is the act of purchasing. As a result, we’re seeing a return to entertainment and community within the retail landscape.

This session will highlight two innovators who are rethinking shopping as must-see content and one-of-a-kind experiences.

Aaron Levant, CEO of NTWRK, will talk about how NTWRK built an app that blends a schedule of compelling programming with a live shoppable concept to reach the devoted fanbases of verticals including gaming, music, sports and media.

Ben Kaufman, CEO of CAMP, will talk about how this NYC toy store united shopping and play in an immersive store experience meant to evoke the fun and magic of summer camp for the whole family.

Curated in collaboration with:

SPEAKERS:
Ben Kaufman, Founder and CEO, CAMP
Aaron Levant, CEO, NTWRK
2:00 - 2:30pm | SHYFT STAGE, LEVEL 4
PROGRAM TYPE: FEATURED SESSION

**Store of the future: Rethinking physical retail's role and strategy**

The digital transformation journey is impacting retail business models and is driving a new approach to stores.

Physical locations will play a key role in acquiring new clients, collecting data, building relationships and operating as fulfillment centers, delivery points and service providers.

Combining low friction with elevated experience will be crucial for the success of the stores. Emerging business models will require new KPIs, metrics and ways of measuring the store’s contribution to the brand.

This session examines the need to re-define the store’s strategic value and contribution in a digitally transformed retail model.

It will explore how Rituals Cosmetics have grown from 1 to 800+ standalone stores around the world, updating each store concept with different building blocks, unique to its customers. The success of the Brazilian footwear brand Melissa with its experiential global lifestyle store concepts that are all kinds of cool. Attendees can lastly learn from the leading Brazilian house of premium brands Soma Group which is building a successful portfolio of fashion retail brands and chains - developing internationally.

SPEAKERS:

**Alberto Serrentino**, Founder, Varese Retail

**Raquel Metz Scherer**, Managing Director, GRENDENE SA

**Fabio Barreto**, CEO FARM Rio Global, Grupo de Moda Soma

**Richard Lems**, Director, Format and Store, Rituals Cosmetics

EXHIBITOR BIG IDEAS
Omni-channel agility – Maximizing customer service and profitability

Your customers expect convenient, seamless brand experiences and compressed fulfillment timeframes. However, omni-channel complexity makes it challenging to meet customer expectations with a focus on profitability. Learn from the CIO at Spencer’s/Spirit Halloween about how they: optimize enterprise inventory visibility and omni-channel order orchestration; take pop-up stores to another level; leverage BI for improved decision-making; and adopt a strategically agile, unified and profitable approach to customer-centric commerce. You will leave this session with pragmatic strategies and tactics to improve order profitability.

SPEAKERS:

Jim Barnes, CEO, enVista
Why retail organizations are now embedding AI in their DNA culture

The empowered consumer is more connected and informed than at any other time in retail history. Retailers must now start anticipating and predicting their consumer's evolving needs and habits by transforming their business decisions through embedding AI in their DNA culture. Learn how best-in-class retailers are using AI machine learning to identify signals and patterns in their data, to become truly customer-centric; adopting an AI Demand Forecasting approach and at the same time increasing operational efficiencies to ensure a frictionless customer experience.

Winning the battle for the customer with self-serve automation

Whether it is big e-commerce competition or third-party delivery services, disruptors in the industry are causing brands to fight for a better customer and associate experience. Smart retailers are embracing technology, like automating order pick-up, to provide opportunities for brand engagement no matter how the customer chooses to engage. And while this technology shift is happening, retailers are also seeing streamlined order fulfillment more satisfied customers and top-line growth. Hear from leading organizations who are focused on putting customers and associates first and enhancing the customer experience in a way that keeps the brand top of mind.

SPEAKERS:
Mike Wills, Chief Revenue Officer, Apex Supply Chain Technologies
The Rise of Female-Led DTC Companies

The retail industry is constantly evolving, and women-owned startups, direct-to-consumer (DTC) companies, and entrepreneurs play a critical role in its transformation. Hear from the inspirational female retail leaders who are adapting to changes in consumer behavior, including new business models that are disrupting established industries and activating positive social change.

SPEAKERS:
Kerry Cooper, President and Chief Operating Officer, Rothy’s
Gabby Cohen, SVP, Marketing and Brand, Rent the Runway

Humans are back: Why companies are putting a premium on the human element in the digital age

Customer service is broken. Instead of forging better human-to-human connections, companies are using tech to build walls with customers. But the brands consistently breaking through today have put a premium back on the human element. Whether providing expert guidance or solving an in-the-moment need, savvy companies are re-investing in their people and creating new ways to connect with their customers to deliver superior customer experiences that cannot be automated.

In this session, Olivier Blayac, the General Manager of Color&Co, will outline how the new DTC brand from L’Oréal’s incubator is helping upgrade the at-home hair coloring experience with a platform that offers live video consultations with a professional colorist to create a custom formula that is sent directly to their door, using digital tools to bring the high-touch salon experience to consumers at home.

Callie Field, the Executive Vice President of Customer Care at T-Mobile, will speak about T-Mobile’s Team of Experts—a radically new approach to customer service that puts people first. When you call, you’re immediately connected to a customer
service Expert. No bots. No automated phone menu. You get your very own Team of Experts who are dedicated to you and others in your city. Since launching nationwide in 2018, Team of Experts has set records for customer satisfaction.

Living in an Amazon world: New rules!

Let’s face the facts: the battle is over—Amazon won, three years of research don’t lie. In the last three years, Amazon had a $100 billion increase in revenue, delivered a consumer research satisfaction rating that’s consistently 20% higher than their competitors, and is considered a "favorite" brand by 50% of consumers surveyed. So what can we learn from the victor? WD Partner's EVP and expert strategist Lee Peterson will look at the "new rules" defining 21st century retail, show how retailers should structure their organizations for this business transformation, and help you visualize how this will redefine what we now call a store.

SPEAKERS:

Lee Peterson, EVP, Brand, Strategy and Design, WD Partners

PROGRAM TYPE: FEATURED SESSION

Retail as a service: Using plug-and-play infrastructure to test and learn in the physical retail channel
Faced with rising costs associated with customer acquisition and increasing competition online, many direct-to-consumer brands are looking to physical retail as a way to stand out, drive awareness and build emotional connections with their audiences. Because the barrier to entry remains high, a new type of retail service provider is offering these brands flexible, turnkey solutions for entering physical retail, allowing them to test and refine concepts and products and engage with their customers in new ways.

Experts Matt Alexander and Kevin McKenzie will discuss the advantages of this new retail model and highlight the opportunities for both brands and real estate service providers.

Matt Alexander is the co-founder and CEO of Neighborhood Goods, a department store for the modern age, featuring an ever-changing selection of direct-to-consumer brands, many of whom are entering the physical space for the first time. After launching in Plano, Texas, in 2018, Neighborhood Goods is opening a store in New York City in fall 2019.

Kevin McKenzie is a digital entrepreneur and previous Chief Digital Officer at both The Macerich Company and Westfield where he led digital transformation and omnichannel initiatives. Most recently he developed and launched BrandBox, a turnkey approach to physical retail for digitally native brands to open and operate stores within the Macerich Company’s malls.

Following the presentations, there will be a Q&A moderated by Scott Lachut, President of Research & Strategy at PSFK, the business intelligence platform for innovation in retail and CX.

How Tractor Supply cultivates true omni channel wins

With more than 1,800 stores across the US, Tractor Supply has discovered the winning formula for merging its in-store and online customer experiences. Come hear Letitia Webster, VP Omni Channel for Tractor Supply, and Sören Stamer, co-founder and CEO for CoreMedia, discuss how a clear customer vision and an iterative approach can drive transformational change.

SPEAKERS:

Soeren Stamer, CEO and Co-Founder, CoreMedia AG
Letitia Webster, VP, Omni Channel, Tractor Supply

Session produced by Ultinous
Tailor the in-store engagement using true 360 customer profile
The key to success in today’s competitive retail space is meeting the customer where they are and delivering tailored experiences. Good examples abound for doing so digitally, but when it comes to a personalized in-store engagement, retailers need a way to bring physical in-store shopping data together with digital profiles, and make that information available in real time.

SPEAKERS:
Kazuki Ohta, VP, Technology, Data Services, Arm, Inc.

Winning the experience economy: How to raise the bar in a world of raised expectations
With consumers expecting increasingly seamless shopping experiences, who is meeting consumers where they are, instore, online or in-home? In consecutive interviews, hear from three CEOs who are setting the vision and raising the bar by meeting "me-commerce" demands in a world of always on-demand.

Overflow seating available at the Medallia Stage, Hall E, Level 1.

George Clark, Technology and Customer Experience Director, Mulberry

In store innovation, do I really want a robot?

In store innovation options abound for the retailer. Artificial intelligence, in store robotics, inventory analytics and computer vision all hold potential. The tough call is what makes sense for your format. Beyond the selection, what does it take to pull it off? At the top of the list is IT support, operations adoption, customer acceptance, supplier capabilities and continued improvements. For success, all these and more must be considered before the launch. Two retailers discuss their current journeys.

SPEAKERS:
Tim Rowland, CEO, Badger Technologies
Rob McCartney, Format Development Director, Woolworths Food Group
Learn how AI is transforming network operations for retailers

Customer engagement and network connectivity are becoming more and more critical to the success of today's retailers. And with the soaring numbers of mobile and IoT devices, managing a distributed network of stores and engaging with customers is becoming more challenging. Join this session to hear how organizations such as top retailer, Petsmart, are investing in AI-driven technology to transform IT operations rather than being stuck in a technology refresh cycle, ultimately driving up profitability and in-store experience.

SPEAKERS:
Bob Friday, CTO and Co-Founder, Mist, a Juniper Company
Dave Caldwell, VP, IT Service Delivery, PetSmart

EXHIBITOR BIG IDEAS
AI/ML at work - Albertsons, IKEA and Save A Lot’s journey to the edge

How do you leverage the best artificial intelligence and machine learning to enhance customer experience and improve operational efficiency? Leading retailers are harnessing AI/ML to better manage their supply chains, predict optimal inventory, reduce waste, power more profitable decisions, and deliver a seamless customer experience. Join this panel presentation to hear from leaders at Albertsons, IKEA & Save A Lot as they discuss what put them on the path towards the edge. Leave this session with a roadmap to achieve real results using AI/ML.

SPEAKERS:
Wayne Usie, EVP, Market Development, JDA Software
Rucha Nanavati, GVP, IT, Albertson's
Lars Gunnarsson, Deputy Manager & Digital Transformation Leader, IKEA Food
Brad Coons, CTO, Save A Lot

Human centered digital transformation: How adidas is creating human-digital collaboration

In a volatile world with accelerating digital disruption, consumers are continually redefining what a great experience looks like, and the first-mover advantage is shorter than ever.

A response to this challenge is to leverage human potential to find new meaning and create value for customers. adidas is achieving this by creating new human and digital collaboration to create meaningful and effective digital customer solutions.

SPEAKERS:
Peter Brook, Director of Omnichannel Solutions, adidas
Price, strategies and agility: Thriving in a multi-channel retail environment

Today’s shoppers demand convenience and accessibility on their own terms, with the flexibility to shop and receive merchandise in channels of their choice. Whether a retailer begins as a brick-and-mortar player and begins to embrace online, or expands from etail roots to develop a physical presence, retailers must structure for success in a multi-channel environment. Hear from retailers that are pricing smarter, not harder, from across a range of sectors with an array of business models in a lively, interactive discussion of their challenges, strategies and successes in addressing opportunities across channels.

SPEAKERS:
Scott Zucker, SVP, Customer Success, Revionics
Barrie Carmel, Chief Value Optimization Officer, Bed Bath & Beyond
Moussa Coulibaly,
VP, Pricing, Merchandising Analytics and Reporting, DICK’S Sporting Goods
Leonardo Cyreno, Pricing Director, Leroy Merlin Brazil

Protecting the magic and transforming the rest

The retail industry is everchanging and retailers need to keep up to stay competitive. Digital transformation across the business and cost savings are among the key priorities for most companies, including the multinational retailer, Marks & Spencer. Join Davide Breda, Head of Finance - Corporate Information Strategy, as he talks about how M&S is enabling better decision-making by closing the loop between analytics, simulation, and planning using the Board platform. Davide will focus on how M&S is increasing efficiency using Board’s Integrated Business Planning approach.

SPEAKERS:
Davide Breda,
Head of Finance - Corporate Information Strategy, Marks & Spencer
10:15 - 10:45am | STAGE 5, EXPO, LEVEL 3

How strong content marketing and headless commerce helped burrow disrupt an industry
Burrow’s CEO, Stephen Kuhl, is changing the way people buy sofas and couches online and redefining customer profiles through a headless commerce approach. Using creative content marketing tactics including photography, video, and retail events, he is crafting a brand that stands out in a sea of retail furniture sellers. Learn how Burrow is innovating their channel strategy to strike the right marketing mix between introducing new marketing channels and scaling existing ones to reach different audiences.
**How we built a high preforming frontline**

Frontline employees are the face of your organization. Their ability to execute can make or break your business. But they are highly dispersed, experience high turnover and work in introductory positions. This executive panel will share how they have defied the trend to drive business results by focusing on their frontline teams, and shifted their organizations’ mindsets regarding the importance of supporting the frontline. They’ll also share how they tactically leverage Axonify to grow frontline knowledge and foster ongoing business agility.

**Session produced by Riverbed Technology**

**Technology: How retailers can stay alive and create exceptional customer experiences**

Physical stores are shuttering faster, making customers travel farther to shop at their preferred retailers and requiring brands to ensure worthwhile customer journeys. With fewer stores, retailers must maximize traffic into each of them, or else they jeopardize their businesses. Bad experiences can quickly become detrimental, but technology can help create remarkable customer experiences. As stores represent enormous value, branding, and convenience, learn how retailers are using technology to provide extraordinary customer experiences.

**SPEAKERS:**

Glenn Shoosmith, Founder and Chief Architect, JRNI
A burger with benefits -- From Beyond

Americans are making room at the table for plant-based meats and Beyond Meat is grabbing its share of stomach. The company surprised Wall Street with a stunning IPO and has announced partnerships with Dunkin and Subway. But are grocery stores doing their part to woo shoppers? Hear from a top executive at Beyond Meat and learn how one forward-thinking supermarket merchandiser is raising the bar when it comes to merchandising this fast growing segment for maximum success.

SPEAKERS:
Seth Goldman, Executive Chair, Beyond Meat
Tonya Herring, Senior Vice President, Merchandising, Giant Food
Phil Lempert, Editor, SupermarketGuru.com
Circular business models: How a closed-loop supply chain can create new opportunities

Consumers' increasing demands for sustainability are driving brands to rethink their end-to-end supply chain and consider the environmental impact of their products and packaging throughout their lifecycles. Forward-thinking brands are stepping up to take responsibility through post-consumer initiatives that remove the friction from refilling, recycling or reselling their items. These new business models not only accommodate the desires of eco-minded consumers but also present exciting new business opportunities for brands.

Tom Szaky, CEO of TerraCycle, will discuss their Loop initiative, a circular shopping platform that enables consumers to shop for household goods in durable, reusable packaging and has allowed a host of leading CPG brands to eliminate single-use packaging while also creating a new model of shopping.

Phil Graves, Patagonia’s Head of Corporate Development, and Andy Ruben, CEO of logistics and technology startup Yerdle, will share how their partnership is an example of how brands can launch recommerce solutions like Patagonia’s Worn Wear to embrace more circular models of business and help brands own their resale market and customer relationships.

Curated in collaboration with:

SPEAKERS:
Tom Szaky, CEO, TerraCycle
Andy Ruben, CEO and Founder, Yerdle
Phil Graves, Head of Corporate Development, Patagonia
Virtual Design Tour 2020: The year's best designed new stores of New York

Every year, New York City hosts the opening of more new retail environments than any other in the US, and this year is no exception. New concepts, new directions and new experiences all come together in stores that you must see while visiting the Big Apple. Technology changes retail but not used in an overt way - helping companies do the things they say they want to do.

SPEAKERS:
Kyle Nel, EVP, Uncommon Partners Lab, Singularity University
Håkan Nordkvist, Head of Sustainability Innovation, IKEA Group
Learn how 4 leading global retailers have harnessed a culture of innovation and customer obsession to deliver outstanding experiences

These are not just buzzwords. You'll hear how retailers are actually achieving this.

But there’s no single recipe for success, some aim to create personal and emotional connections with their customers, others focus on empowering their employees with more access to customer knowledge than they’ve ever had before.

So combine this with a desire to learn and experiment, and an understanding that you can fail fast when you innovate- sometimes you’ll learn more from your failures than your successes.

Some brands are nailing this, and in this session, we'll hear about their secrets to ensuring that customers remain at the heart of their business, and how a culture of innovation drives them forward.

SPEAKERS:
Alex Genov, Manager of Research, User Experience, Zappos.com
Jake Knowles, Senior Retail Consultant, BJSS Ltd.
Heidi K Isern, Sr. Director, Customer Experience Innovation, Gap Inc.
Alexa Geovanos, Brand President, North and South America, Chloé
Marc Dench, Chief Financial Officer, Joules
12:00 - 12:30pm | MEDALLIA STAGE, HALL E, LEVEL 1
PROGRAM TYPE: FEATURED SESSION

**Stronger together: The power of cybersecurity industry collaboration**

Retailers are competing every day for customers’ time and attention, but it is possible to be fully collaborative (and non-competitive) in service of protecting consumer information? Target’s Chief Information Security Officer, Rich Agostino, will talk about Target’s journey to build an industry-leading program, train the next generation of cybersecurity leaders and stay ahead of the latest threats. He will be joined by other retail cybersecurity leaders to discuss the importance of strong industry cybersecurity collaboration and the power of joint cyber intelligence to fight the bad guys together.

**SPEAKERS:**

Rich Agostino,
Senior Vice President and Chief Information Security Officer (CISO),
Target Corporation

Transforming for a new era of talent

As retailers face competitive disruption and changing consumer requirements, they are simultaneously confronted with never before seen challenges with their workforce. Much of this is driven by demographic and population shifts, pace of technology change and innovation as well as aggressive new competition. It is clear that associate expectations and the employee/employer relationship are changing. Retailers must rethink how they plan for, source, engage, and retain talent in this new era. Join this panel of industry leaders as they discuss these challenges and how they are confronting them head-on.

The innovative spirit and demographics driving retail technology
How are tech-savvy shoppers redefining retail experiences beyond four walls? How are retailers and brands attracting customers that demand reliable experiences at every touchpoint on every device?

Join Comcast Business and a panel of industry experts to discuss how they’re differentiating themselves from the competition by continuing to innovate and expand their value to meet the needs of their customers. At the core of enabling these trends is the technology that can drive customer experiences, attract and retain new customers, and improve employee satisfaction.

SPEAKERS:
Glenn Katz, VP and GM, Enterprise Solutions, Comcast Business Services

Deep Dive into Diversity & Inclusion Initiatives
Part of succeeding in the retail industry depends on your ability to understand the target audience. Learn how leaders are using data and metrics to better serve their customers, employees, and partners.

SPEAKERS:
Janet Sherlock, Chief Information Officer, Ralph Lauren
Jill Standish, Senior Managing Director and Global Head of Retail, Accenture
Sabeen Mian, Executive Vice President, Merchandising, IPSY
Creating influencer marketing strategies with Supermodel Coco Rocha, TechStyle Fashion Group and Viacom Nickelodeon

Influencer marketing has evolved into a legitimate sales channel for retail brands looking to form authentic connections with consumers. With shoppable posts launched on Instagram and Pinterest and the proliferation of video in YouTube's Stories, brands have even more ways to increase sales and engagement via influencers. This conversation will also explore authenticity, the importance of video, how data and benchmarking are being utilized, if and where micro influencers fit in, and trends our experts see unfolding.

SPEAKERS:
Frank Weil, Chief Customer Officer, KWI
Coco Rocha, Supermodel, Entrepreneur and Owner, NOMAD MGMT
Andrea Fasulo, Global Head of Retail Marketing, Viacom Nickelodeon Consumer Products
Laura Joukovski, President of Global Fashion Brands, TechStyle Fashion Group
How voice and other AI-powered experiences are reshaping retail

Understanding what drives connected journeys across converging channels, touchpoints, and experiences is what will deliver sustained growth and success for retailers in the modern era of commerce. AI-powered experiences are opening the doors to offer a seamless experience to customers across this connected journey, and ushering in a new era of commerce. Ecommerce platforms are increasingly using AI to engage with customers through voice, to remove friction for users and enable simpler, more intuitive interactions, thereby allowing the retailers that best understand these needs to be the first to lead customers to relevant content and solutions.

In this session, Patrick Gauthier, VP of Amazon Pay, will highlight the ways in which voice is redefining the customer experience and how early adopters can use voice to establish a personal relationship with consumers. He will also speak about the innovations that are making it easier for retailers to connect with their customers ‘in the moment.’

Kerry Cooper, COO of Rothy’s, will share how the DTC footwear brand is leveraging tools like voice in order to create a seamless customer journey.

Curated in collaboration with:

SPEAKERS:
Kerry Cooper, President and Chief Operating Officer, Rothy’s
Patrick Gauthier, Vice President, Amazon Pay
Rewiring retail thinking to celebrate diversity

It's not just about fit, it's about fitting in. With more consumers shopping at brands that reflect their own values, leading retailers are taking a bold, vocal point of view on the biggest social and cultural issues of our time to create a more authentic, personal relationship with shoppers. Bonobos offers "a fit for every man and a place where all men fit." Sephora is championing its “We Belong to Something Beautiful” initiative to reflect its internal values externally; they're committed to building a community where diversity is expected and all are welcomed. Find out how these companies are raising the bar on diversity and inclusion and evolving their brands to be more in sync with today's consumer.

SPEAKERS:
Micky Onvural, CEO, Bonobos
Karalyn Smith, Chief People Officer, Sephora
Chip Cutter, Reporter, The Wall Street Journal

Retailer Table Talks

Open to Retailers only.

Join these small group, retailer only discussions focusing on specific topics and challenges retailers are facing today. The intimate environment will enable you to share and hear solutions, unique perspectives and valuable takeaways to implement immediately. Discussions are chosen by and led by retailers. Space is limited and will be first-come, first-served.

EXPO Tours

Open to Retailers only. Separate registration required.

EXPO Tours can be purchased when you register for NRF 2020 or through the dashboard after registration has been completed.
NRF, in partnership with CIM Tours, is providing four unique Expo Tour experiences. Each curated, two-hour tour will visit exhibitors recognized for delivering the latest in retail technology across multiple business disciplines.

**Artificial Intelligence**  |  Artificial Intelligence is taking retail to a new level and changing the way we shop. Learn how retailers are using advanced AI with first-party data, real-time AI-based recommendations, AI-enabled decision platforms, customer driven AI insights and much more!

**Customer Experience**  |  Customer experience today is driving the success of brick & mortar. Retailers are using smart sales associate tools to enhance the shopping experience, reduce check-out friction, streamline internal communications, and collect real-time customer feedback. Cutting-edge smart signage, RFID and 5G are making the retail environment more responsive and interactive. Meet the companies enhancing the customer journey and winning in retail today.

**Digital Experience & Ecommerce**  |  Creating digital experiences that matter to consumers drives results. As digital continues to permeate the retail landscape, today’s shoppers are demanding less payment friction and a quicker shopping experience. Learn how retail leaders are using digital in every aspect of the customer journey to drive results.

**Future & In-store Tech**  |  See the newest technology trends and breakthrough products in retail today. Learn how AR/VR can engage shoppers, how technology is enhancing the shopping experience, and how click and collect reduces friction and satisfies customers. Attendees will visit companies focused on innovation and get a sneak peek at technology powering the future of retail.

PROGRAM TYPE: EXHIBITOR BIG IDEAS

A true data driven digital transformation that delivers superior customer experience

In a world of hyper-personalization and ever-changing consumer habits, Grupo Exito understood that customer-centric digital transformation could only be accomplished by the support of a sound data driven approach. Extracting true business value from their data through a strong MDM strategy, Grupo Exito delivered extraordinary customer experience by providing consistent customer service and relevant content across today’s complex buyer’s journey.

SPEAKERS:
Camilo Gallego Ferrer, Vice President, El Grupo Éxito Services

3:15 - 3:45pm | STAGE 2, EXPO, LEVEL 1
PROGRAM TYPE: EXHIBITOR BIG IDEAS

How retailers are modernizing planning for the digital era

Hear from Carter’s, L’Oreal and Estee Lauder on how they are modernizing their approach to enterprise planning to better support the digital era in retail. In a panel discussion, learn how these innovators have been able to transform decades-old approaches to merchandising, assortment, pricing, and supply chain planning through “Connected Planning.”

SPEAKERS:
Ben Pivar, CIO, Carter's
Ara Gopal, Head of Industry Solutions, Anaplan
Erika Vazquez, AVP, Retail and Ecommerce, Supply Chain, L’Oréal
Scott Thistlethwaite, VP, Finance and Strategy, Global Strategic Pricing, The Estee Lauder Companies Inc
How Zipline helps each Gap Inc. brand communicate with their associates

We all know frontline associates are the face of your brand… but what’s the best way to actually connect with them? What info should they see? What’s the right level of detail to include? What’s the best platform to reach them? Fortunately, Gap Inc. has thought long and hard about this. Come learn how they partnered with Zipline to tackle this issue in a way that suits all of their five diverse brands individually - and made their employees happier and more productive in the process.

SPEAKERS:
Melissa Wong, CEO and Co-Founder, Retail Zipline
Kaitie Larsen, Product Manager, Gap Inc.

Leveraging prescriptive analytics to increase sales and margins

Prescriptive analytics creates a better framework to positively impact sales and margins. While retail has historically been a ‘data desert’, driving myopic approaches to control and visibility, the amount of data sources available today provide new opportunities (and challenges) to both understand and measure activities impacting sales and margins. Executives from REI, The Home Depot and Zebra Prescriptive Analytics will discuss the benefits of leveraging technology to create actionable insights that drive transparency and accountability across the business.

SPEAKERS:
Scott D Glenn, Vice President, The Home Depot
Guy Yehiav, GM, Zebra Analytics
Seth Hughes, Director, Asset Protection, REI
Why OMS+POS on a common data model is crucial for unified commerce

Customer-centric, unified commerce requires point-of-sale (POS) to move beyond transactional applications to a comprehensive customer engagement platform. A POS strategically built on an OMS platform allows brands to build a retail network where each store becomes another supply chain node with inventory visibility and access to fulfill items from all stores, distribution centers, suppliers and 3PLs. It also empowers store associates to engage in clienteling with a single view of the customer order history and profile across all channels, and much more. Learn how an advanced POS has helped American Freight Furniture significantly enhance its customer experience and engagement.

SPEAKERS:
Jim Barnes, CEO, enVista

Global retail mindset: Bold moves from leaders fueling future growth

In consecutive interviews, hear from retail and brand executives with penchants for evolution who are tackling new growth challenges, reimagining core customer strategies, and living up to their "change agent" personas. Featuring leaders with bold ideas for leading enterprise transformation, each interview will examine the company's current landscape, ideas to solve or proactively disrupt industry challenges, and each executive's vision for future profitable growth.

Overflow seating available at the Medallia Stage, Hall E, Level 1.

SPEAKERS:
Helena Foulkes, CEO, Hudson's Bay Company
Tim Steiner, CEO, Ocado Group
Innovate or die! Free funds to drive customer experience and growth

With fierce, global competition, your enterprise is either growing or dying. Pressure is mounting to transform while you are burdened by a growing technical deficit. Learn how CIO's and CFO's strategically use Business-Driven Roadmaps to overcome the deficit, create competitive advantage and growth.

SPEAKERS:
Sebastian Grady, President, Rimini Street, Inc.

Session produced by Aerospike

The returns opportunity; How return optimization technologies benefit retailers and consumer experiences

As consumer expectations become rigid around returns and the returns experience, many retailers and brands struggle to keep up with these demands at the expense of smart and sustainable business decisions. Join us and Ben Sayles, Strategy, Innovation and Business Development Manager at IKEA USA, as we discuss how retailers and brands can utilize returns optimization technologies as a way to turn returns into a profitable opportunity while contributing to a positive customer experience.
4:00 - 5:00pm | EXPO, LEVEL 1, 3 AND 4
PROGRAM TYPE: NETWORKING EVENT

**Expo Happy Hour**
Time for a drink. Unwind from a busy day and stroll through the aisles to take in the latest visionary retail tech.

**Sponsored by:**

Capitalizing on the currency of innovation and building for a stronger tomorrow

Technology and evolving consumer expectations are transforming how retailers, and companies across all industries, evaluate their businesses. Brands must build ongoing relationships with their customers and employees, grounded in a shared purpose and differentiated with unique experiences. In this fireside chat, Mastercard president and CEO Ajay Banga will share insights on how the company is maximizing partnerships and technologies with a long-term vision to deliver greater access, convenience, security and, ultimately, results. The session will explore the importance of being flexible, innovative and adaptive to extend the impact a company can deliver both locally and globally for its stakeholders and for society.

Overflow seating available at the Medallia Stage, Hall E, Level 1.

SPEAKERS:

Matthew Shay, President and CEO, National Retail Federation
Ajay Banga, President and CEO, Mastercard

Guided Retail Store Tours

Separate registration and additional fee required.

Guided Retail Store Tours can be purchased when you register for NRF 2020 or through the dashboard after registration has been completed.

Retail Store Tours provide curated, two-hour guided walking tours of cutting-edge spaces by global retail leaders. See firsthand how these retailers are using their understanding of our changing behaviors and technology to enhance the customer experience.

Each guided tour visits five carefully selected stores at a premier shopping destination. Tour guides will lead groups to the selected stores where a store administrator will speak about the features, innovations, store design experience, customer service enhancements and brand stories. Each store visit will last 15 minutes, and each tour lasts two hours.
Hudson Yards: The State of Excellence Today
Hudson Yards represents the best of what retail has to offer! This new addition to New York City retail is the largest private real estate development in the U.S. Join this tour to see the five trends driving successful retail today: Elegant Innovation, Discovering Innovative Retail Models, Retail as an Experience Destination, Experiences that Inspire Shopping, and Out-of-the-Box Retail.

Oculus: A Tour for the Senses
See how the largest shopping malls in Manhattan -- Westfield World Trade Center and Brookfield Place -- are transforming downtown shopping and using cutting-edge design, sales associate training and innovative experiences. The Oculus has the most diverse array of retail innovation in New York City, featuring pop-ups to flagship stores, along with iconic retailers and online brands that have transitioned from online to brick and mortar.

SoHo: Innovation & Reinvention
SoHo is one of New York City's prime shopping destinations and the preferred location for launching a new business concept or reinventing an old one. Throw a stone down any street in the area and you'll hit a number of exquisite retail destinations. Cobblestoned streets and loft-like spaces make the neighborhood a pleasant spot for shopping and inspiration. This tour will highlight visionary business innovators and savvy re-inventors.

Iconic Retailers
This tour of New York's iconic retailers offers insight into the latest innovations in store design with the ideas, influencers and thought process behind their conception. The tour will visit iconic stores in the heart of the Midtown shopping district. Experience store innovation, tech, store concepts, merchandising, and how brands are seeing sustainability.

Winning the long game: Finding sustained profitability in a low-growth world

How do you drive growth and sustain value in a retail landscape that is being transformed by new players who are pushing—and breaking— the boundaries of traditional retail? Retail returns are diminishing and topline growth prospects are as abundant as they were even a few years ago. Longstanding players are challenged on multiple fronts: a consumer with unparalleled choice, lower barriers for new formats, and a proliferation of new business models competing for share of wallet. To succeed in this environment, retailers must find new ways to go-to-market and draw inspiration from across industries. While retail will likely start facing challenges to growth, Consumer Products companies have been navigating a low growth environment while earning healthy profits. Join Deloitte and a prominent CPG CEO to explore how successful consumer products companies are competing in a slow growth environment and in what circumstances M&A is creating shareholder value.

SPEAKERS:
Rod Sides,
Vice Chairman and U.S. Leader, Retail, Wholesale and Distribution Practice,
Deloitte LLP

EXHIBITOR BIG IDEAS
Connecting digital consumers and stores with location intelligence

Estee Lauder is one of the world’s best loved consumer products companies. Jakala and Esri are the leading providers of location intelligence solutions to business. Jessica Boer will discuss how Estee connects with their customers digitally and in physical locations through location. Customers who engage with a retailer across multiple channels are far more valuable for the retailer than those who engage on a single channel. Come and learn how Estee is able to see what others can’t with location intelligence.

SPEAKERS:
Gary Sankary, Global Retail Industry, Esri
Jessica Boer, VP, Global Retail Strategy, Estee Lauder

Busting the loyalty myth in retail

Creating loyalty typically centers on incentives with economic benefits—loyalty cards, points programs, exclusive member discounts. But loyalty isn’t a feel-good metric. It’s a powerhouse of performance - as long as you don’t settle for the myth.

Join Nan Russell, Senior XM Scientist from Qualtrics, to learn how to:
- Harness the power of experience management (XM) to create customer passion, commitment, and loyalty.
- Empower employees to deliver on your brand promise and deliver exceptional customer experiences.
- Infuse customer feedback into product design and foster co-creation with consumers.

_Jon Duke_, VP, Research, Retail, IDC Retail Insights
Session produced by WorkJam
CPG goes DTC: How modern consumer products brands are building 1-to-1 customer relationships

CPG brands have long been challenged with notions of commoditization and differentiating their products on the shelf. Now they’re facing competition from new digitally native brands that build deep relationships with consumers by primarily selling online. Forward-thinking players are pioneering a new set of practices to build greater value around their core offerings, engage and serve consumers in new ways, and foster long-term loyalty among their customer base.

Monica Turner, P&G’s SVP of Sales for North America, will share how P&G is meeting changing consumer expectations with brand and shopping experiences that make their lives easier and align with their values. To delight consumers in today’s rapidly changing retail environment, P&G’s approach is both high tech and high touch – leveraging the best of digitization, big data and automation while stepping up to make a positive impact on the world.

Craig Dubitsky, founder of hello products, will share how he built an oral care brand with an avid following, generating loyalty and engagement in a category that is generally not known for excitement or aesthetics, by listening to what consumers want — a brand that is friendly, transparent and ethical.

Curated in collaboration with:

SPEAKERS:

Craig Dubitsky, Friendly Founder, hello products
Monica Turner, Senior Vice President - Sales, North America, P&G
How Marriott, Peloton and Shinola are breaking the boundaries of brand experience

In the digital age, brands are breaking the boundaries of their given sectors. They are connecting to customers in transition zones. This is the in-between, where a customer relationship can extend from store to health club and fitness studio to restaurant to hotel stay.

Guests are moving from one side of the experience street to the other as fluidly as products and services flow into and out of their lives. The pace of change and a desire for omni-experience brand relationships are being reset by changing customer expectations about how a brand experience should unfold.

This session will look at the fusion of brand experiences across customer experience segments such as travel and hospitality, fitness and fashion, motivational speaking and personal training and retail, food and beverage.

It will look at how brands are leveraging their relationships to consumers in one category and inventing new ways to engage, with a future-forward vision, in order to extend their reach into their consumer’s lifestyles. The goal is to remain relevant to an emerging cohort of shoppers who want to play by different rules.

SPEAKERS:
David Kepron, VP, Global Design Strategies, Premium Distinctive Brands, Marriott International
Tom Lewand, CEO, Shinola
Jennifer Parker, SVP, Retail, Peloton
Tmall 2.0: Customization + brand creativity = elevated shopping experiences

Alibaba, alongside a brand partner - will outline the business growth opportunities of being on the Tmall platform looking at how Alibaba is developing initiatives like Singles Day, Tmall Luxury Pavilion, See-Now-Buy-Now fashion experiences, and online and offline integrated retail experiences to drive consumer engagement and sales.

SPEAKERS:
Deborah Weinswig, CEO and Founder, Coresight Research
Christina Fontana, Head of Fashion and Luxury Tmall Luxury Division, Alibaba Group

PROGRAM TYPE: EXHIBITOR BIG IDEAS

**Perspectives from retail, manufacturing, and investors on the changing retail landscape**

Retailers and manufacturers need a prescriptive approach using data to meet the demands of today’s consumer. Challenges around growth, profitability, competition, rising costs, are made worse by not having a timely and accurate understanding of their data. To get it right, retailers and manufacturers need an approach that often runs counter to traditional business models. Executives from Walgreens, The O’Alliance, and Zebra Prescriptive Analytics will outline how to leverage technology and analytic-driven insights to transform the way they deliver value to their customers.

**SPEAKERS:**
- **Guy Yehiav**, GM, Zebra Analytics
- **Andrea Weiss**, Founder, The O’Alliance, LLC
- **David Aquino**, Manufacturing EVP, CIO, formerly Shark Ninja
- **Bill Inzeo**, Director, Walgreens

**Food Truck Alley**
Check out the expanded Food Truck Alley and grab lunch from some of New York's most popular mobile culinary artisans. Located along the shuttle drop-off area on level 2.

12:00 - 12:30pm | SHYFT STAGE, LEVEL 4
PROGRAM TYPE: FEATURED SESSION

**Ethical enlightenment in retail -- it's all about stakeholders**
The current speed of transformation of the market and consumers' behaviors reached a point in its exponential curve where the traditional organizational structure, culture and values are not capable of providing the ability to innovate, react and, better anticipate strategic movements to stay relevant. Can purpose-driven business provide the impetus to drive change, and to allow global retailers to achieve commercial, environmental and ethical goals?

In this session the Body Shop’s CEO David Boynton will explore the ‘profits with principles’ model and outline the brand’s reconnection with its roots since being acquired by Brazil’s Natura&Co in 2017. No retail company is better positioned to discuss the commercial and cultural benefits of operating with an ethical vision, purpose and values, and putting stakeholders, not shareholders, first.

**SPEAKERS:**
- **Eduardo Yamashita,**
  Managing Partner and COO, Grupo GS& - Gouvêa de Souza
- **Marcos Gouvêa de Souza,** General Director, Grupo GS& - Gouvêa de Souza
- **David Boynton,** Chief Executive, The Body Shop Ltd.

**The rise of the emotional economy: Honesty, empathy and integrity resonate with consumers**

In an all-too-much world, forgotten virtues are back by popular demand as people rethink what’s important to them. TOBE's Leslie Ghize marks the move from a product and service-based commercial ecosystem to an emotional economy, underscoring why this is taking place and how it will shape retail. Pinterest retail strategist, Amy Vener shares what actions are currently being taken by savvy retailers to show customers that they care and they are listening. Our experts will show how consumer sentiment is changing and how retailers should adapt to stay relevant.

**SPEAKERS:**

Leslie J Ghize, Executive Vice President, TOBE
Amy Vener, Head of Retail Strategy, Pinterest

PROGRAM TYPE: LUNCH HOUR TOPICS

Food for Thought - Coopetition is the new competition: Co-existing with the Tech Titans

*Bring your lunch to this session! Seating available on a first-come, first-served basis.*

*Open to Retailers with a Full Conference pass.*

Retailers and brands pledge more dependence than ever to the four largest technology companies: Google, Amazon, Facebook, and Apple (GAFA). Yet this dependency has come with risk as shoppers are diverted to the whims of these tech companies, while merchants are disintermediated in shopping. Forrester analyst and ecommerce expert Sucharita Kodali will explore how retailer relationships with “GAFA” companies have changed over recent years, and how these technology behemoths will continue to evolve exponentially faster as time moves forward. Ultimately, retailers must draw the line between partnering with large powerful platforms that aggressively harvest shopper data and protecting their identity (and profitability) to serve future generations.

SPEAKERS:
Sucharita Kodali, Vice President, Principal Analyst, Forrester Research
How top retailers use technology to improve the in-store experience

In this panel discussion, learn how Levi’s and other top brands leverage technology like machine learning and RFID to improve the in-store experience for customers. Featuring Anisa Kumar, VP of Operations and Analytics at Levi Strauss, Irad Ben-Gal, Head of the AI Lab at Tel Aviv University, and other distinguished guests.

SPEAKERS:
Irad Ben-Gal, Co-Founder and Active Chairman, Stanford University/C-B4

Office Depot is turning business as usual, upside down

Office Depot’s transformation from an office-supplies retailer to a business-services company is nothing short of revolutionary. The company is embracing technology and automation to upend the supply chain, increase efficiencies in day-to-day operations and free associates from mundane tasks so they can focus on developing closer customer relationships. Hear how the company is bringing together typically siloed and segmented channels under a single banner, so Office Depot is Office Depot, whether you’re shopping in store, online or on a mobile device.

SPEAKERS:
Deb Roth, Sr. Dir., Retail Systems, PMO and Ops Excellence, Office Depot
Jonas Stillman,
Dir., Retail Systems and Omni Channel Initiatives, Office Depot
Omnichannel panel discussion: Integration from product availability to delivery
Omnichannel is now simply “the way things get done,” yet retailers wrestle with doing so profitably. Cross-channel inventory visibility in particular, is elusive, but remains key to making anytime/anywhere/anyhow fulfillment happen. System and data integration from order to delivery are critical to drive both a seamless customer experience and greater efficiency for you. Join this panel discussion to explore integration points of a unified approach; including order management, store fulfillment, dropship and DC operations.

SPEAKERS:
Brianne Murphy, Director, Fulfillment, DSW

The next wave of digital disruption in retail and hospitality
Digital disruption in retail and hospitality isn’t just hype, it’s changing the way companies engage, serve and retain customers almost daily. With change as the new constant, what are the next set of technology inflection points that companies should be focused on? During this session, CDW and Intel will combine their unique market views to highlight how and why they believe two of the technologies that should be at the top of the list are visual retailing and artificial intelligence. These two market leaders will discuss how these capabilities will deliver value to the business and change the customer experience.
Podcast: The Voice of Retail

The Voice of Retail is a weekly podcast hosted by retail pioneer and veteran Michael LeBlanc and produced in conjunction with Retail Council of Canada. On a weekly basis and along with expert commentary and interviews, TVOR takes us through a curated look at the top retail stories in Canadian, U.S. and International retail for the past week.

EXHIBITOR BIG IDEAS
Breaking the mold: Engineering the new retail experience
In a world where we value “doing and sharing” over “buying and owning” how do retailers define the new retail experience for their customers? From sportswear brands building full scale skate ramps and basketball courts in their stores, to brands claiming to have “the world’s most interesting store”, we are most definitely in the age of experience. During this session HERO founder Adam Levene will discuss how retailers are evolving their traditional brick and mortar spaces to put the focus on making memories rather than margin.

SPEAKERS:
Adam Levene, Founder and CEO, Hero

Visionary brand building: Competition is the new collaboration
This session will showcase how retailers and celebrities build enduring brands together through unique partnerships, often times fostering innovations while disrupting the industry.

Wednesday, January 15

Check-in and networking breakfast
Supply Chain and Logistics Workshop

For retailers only; not open to press. Separate registration and fee required.

Workshop can be purchased when you register for NRF 2020 or through the dashboard after registration has been completed.

Join us for a one-day deep dive as we dissect the components of the supply chain and explore the latest technologies and processes needed to shift supply chain initiatives into high gear.

Delivering a seamless customer experience begins and ends with supply chain proficiency. Success is contingent on getting every piece of logistics firing in sync – from planning to continuous visibility and from business process synchronization to destination reliability – and everything in between.

For any questions, please contact programs@nrf.com.

Sponsored by:

8:00 - 8:30am | MARRIOTT MARQUIS, MARQUIS BALLROOM AB, 9TH FLOOR

Guided Retail Store Tours
Separate registration and additional fee required.

Guided Retail Store Tours can be purchased when you register for NRF 2020 or through the dashboard after registration has been completed.

Retail Store Tours provide curated, two-hour guided walking tours of cutting-edge spaces by global retail leaders. See firsthand how these retailers are using their understanding of our changing behaviors and technology to enhance the customer experience.
Each guided tour visits five carefully selected stores at a premier shopping destination. Tour guides will lead groups to the selected stores where a store administrator will speak about the features, innovations, store design experience, customer service enhancements and brand stories. Each store visit will last 15 minutes, and each tour lasts two hours.

**Hudson Yards: The State of Excellence Today**
Hudson Yards represents the best of what retail has to offer! This new addition to New York City retail is the largest private real estate development in the U.S. Join this tour to see the five trends driving successful retail today: Elegant Innovation, Discovering Innovative Retail Models, Retail as an Experience Destination, Experiences that Inspire Shopping, and Out-of-the-Box Retail.

**Oculus: A Tour for the Senses**
See how the largest shopping malls in Manhattan -- Westfield World Trade Center and Brookfield Place -- are transforming downtown shopping and using cutting-edge design, sales associate training and innovative experiences. The Oculus has the most diverse array of retail innovation in New York City, featuring pop-ups to flagship stores, along with iconic retailers and online brands that have transitioned from online to brick and mortar.

**SoHo: Innovation & Reinvention**
SoHo is one of New York City’s prime shopping destinations and the preferred location for launching a new business concept or reinventing an old one. Throw a stone down any street in the area and you'll hit a number of exquisite retail destinations. Cobblestoned streets and loft-like spaces make the neighborhood a pleasant spot for shopping and inspiration. This tour will highlight visionary business innovators and savvy re-inventors.

**Iconic Retailers**
This tour of New York’s iconic retailers offers insight into the latest innovations in store design with the ideas, influencers and thought process behind their conception. The tour will visit iconic stores in the heart of the Midtown shopping district. Experience store innovation, tech, store concepts, merchandising, and how brands are seeing sustainability.
